KAYON DESIGNS LTD

Construciton Logistics and Tender Planning Assistance

Kayon Designs provides specialist construction logistics and pre-construction planning services, supporting developers, contractors and project teams in delivering efficient, buildable and compliant solutions.

Our approach focuses on early engagement, practical logistics strategy and clear stakeholder coordination to reduce risk and improve programme certainty.

Utilising a wide spectrum of m eans and strategies to develop and apply best practice

Logistics Planning

utilising a wide spectrum of means and strategies to develop and apply best practice

Preconstruction Planning

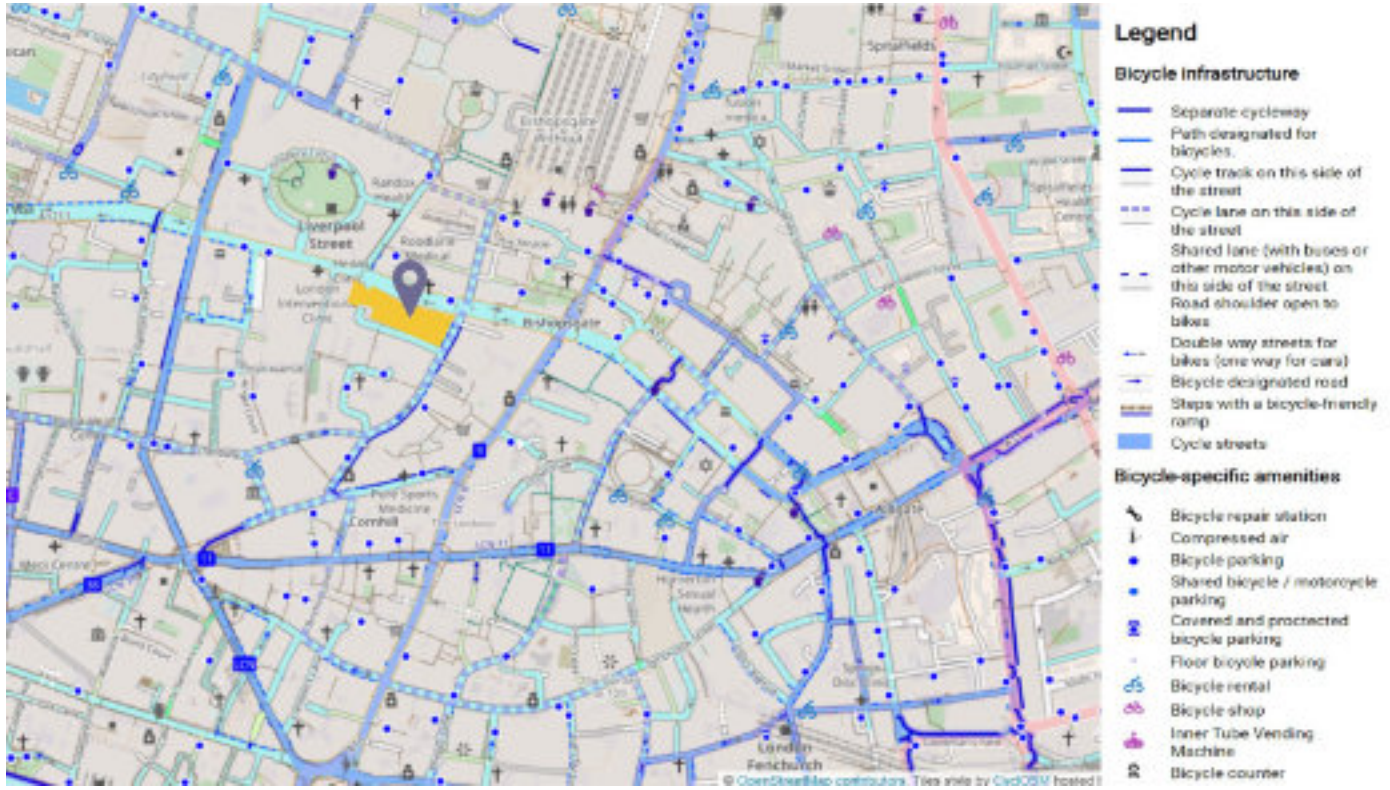

- provide clarity of information
- identify hazards & constraints
- early engagement
- knowledge sharing
- liaison with Local Authorities & other enforcing bodies
- collaboration workshops (client & supply chain)
- alignment of drivers (client needs, practical solutions & imposed standards)

Logistics Planning

Examples of What We Do

- Site Surveys
- Desktop Studies
- Route Planning
- 2D Design & Planning
- Swept Path Analysis
- Traffic Management Plans
- Streetscape
- Vertical Distribution
- Horizontal Distribution
- 3D Modelling & Animations
- Office & Welfare
- Volumetric Modelling

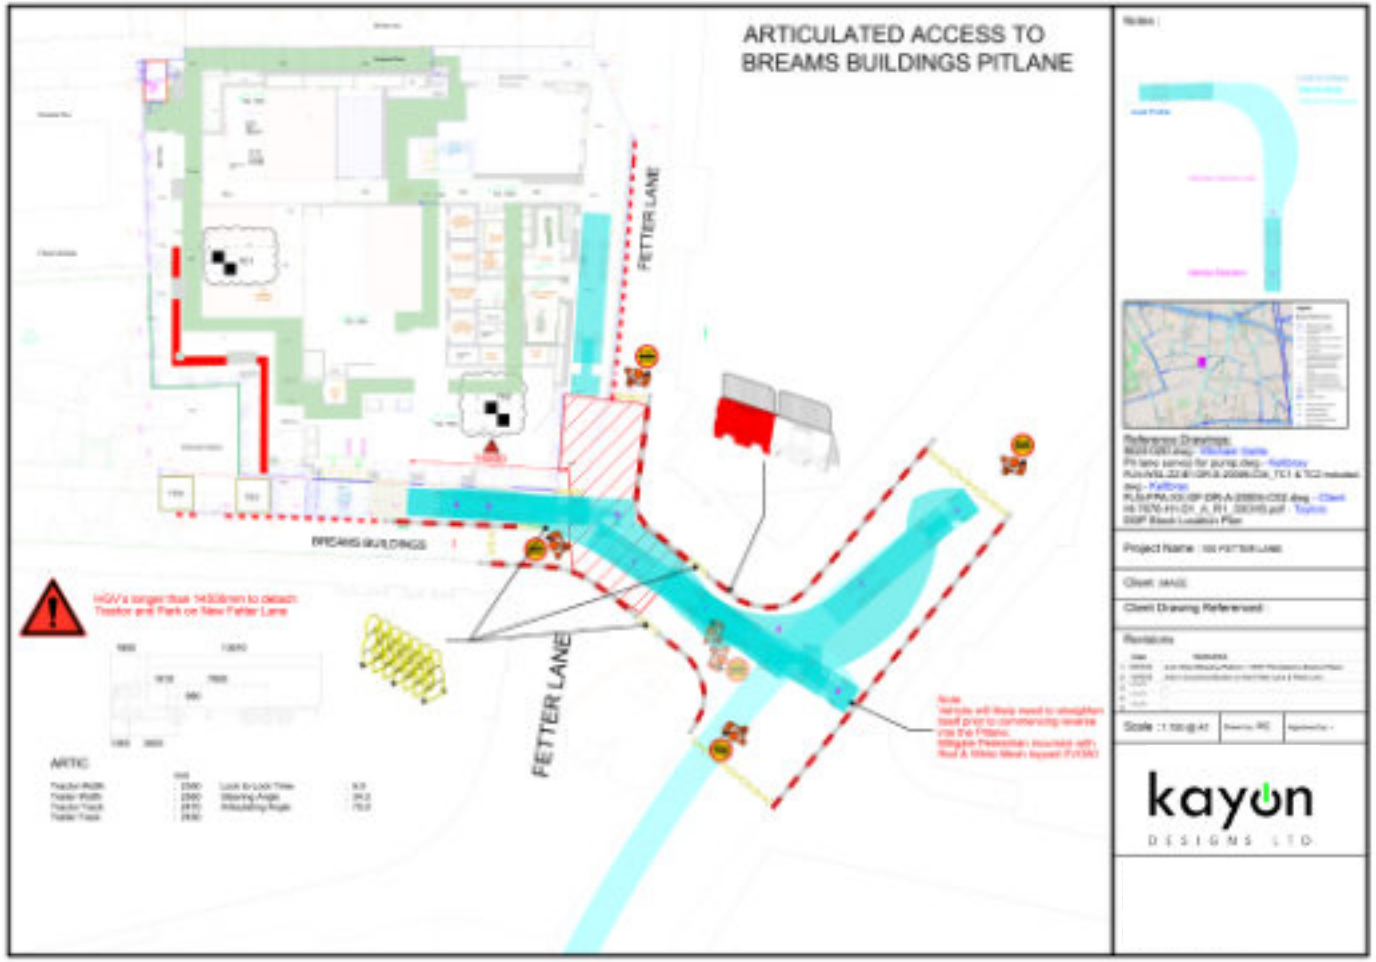

Examples of What We Do

- Site Surveys
- Desktop Studies

Logistics Plans

Scope of Services

Pre-Construction & Tender Support

Review of project constraints and logistics risks

Development of logistics strategy and methodology

Site access and delivery planning

Input into programme, sequencing and buildability

Contribution to tender submissions and technical responses

Planning & Technical Support

Outline Construction Logistics Plans (CLP)

Diagrammatic logistics plans (A3 format)

Access plans and vehicle routing strategies

Swept path analysis coordination (AutoCAD)

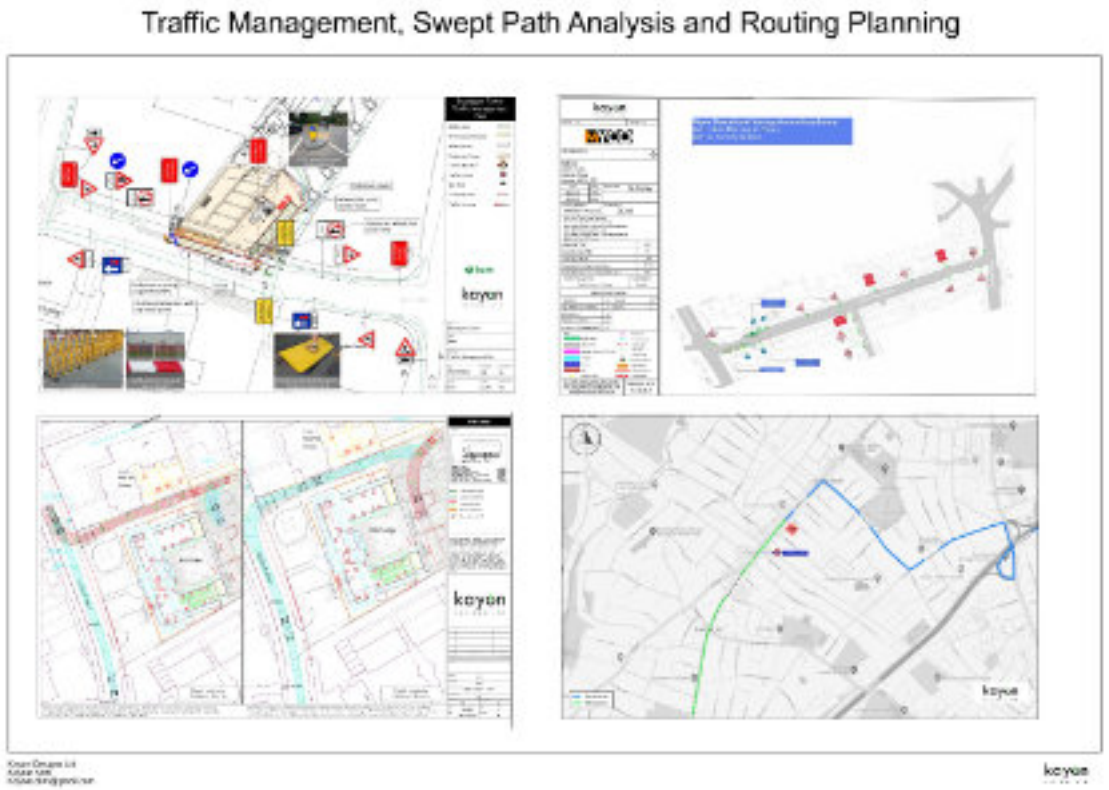

Stakeholder Coordination

Alignment with local authority requirements

Support during planning and tender clarification stages

Liaison with project teams and consultants

Construction Logsitcs Plans

Deliverables

Depending on project requirements, deliverables may include:

Outline or Detailed CLP

Access and routing plans

Swept path drawings

Delivery Forecasting

Hoist Volumetric Studies

Logistics strategy reports

Supporting technical documentation for submissions
